SUMMARY

Junior Full-Stack Developer with strong frontend experience in React, TypeScript, Next.js, and Tailwind CSS, complemented by backend experience with Node.js, NestJS, Fastify, and PostgreSQL. Experienced in developing scalable web applications and integrating distributed services using RabbitMQ, Apache Airflow, and Elasticsearch.

EXPERIENCE

Devoteam Cyber Trust October 2025 — April 2026
Full-Stack & DevOps Developer

- Developed features for a Cyber Threat Intelligence platform using Next.js and NestJS.
- Implemented backend functionality with PostgreSQL and Prisma, including multi-tenant data isolation.
- Integrated asynchronous processing using RabbitMQ and Apache Airflow.
- Used Elasticsearch to support efficient threat-data search and analytics.
- Worked across frontend, backend and infrastructure components to integrate new services into an existing architecture.

EDUCATION

1337 Coding School April 2025
Digital Technology Architecture

Mohammedia Faculty of Science and Technology Juin 2021
Bachelor's Degree in Applied Physics

Mohammedia Faculty of Science and Technology Juin 2020
Diploma of Higher Education in Mathematics, Physics and Computer Science

SKILLS

Tools: Git
Data: MySQL, PostgreSQL, Apache Airflow, Elasticsearch
Frontend: HTML5, CSS3, ReactJS, Next.js, Tailwind CSS
Backend: NodeJS, Fastify, NestJS, RabbitMQ
DevOps: Docker
Programming Languages: JavaScript, TypeScript

LANGUAGES

Arabic (Native) • English (Fluent) • French (Intermediate)

PROJECTS

Multi-Tenant SaaS Platform - Personal Project

- Developing a multi-tenant SaaS platform with Next.js, NestJS, PostgreSQL and Docker.
- Implementing organization-based data isolation and authentication.
- Implementing a real-time weighing process that reads measurements from an electronic scale through a serial port using Node.js and streams the data to the frontend via WebSocket.
- Implementing automated SMS notifications to send a message to an employee immediately after they are added to the employee list.
- Developing backend APIs with NestJS and PostgreSQL/Prisma for organization, employee, and data management.
