Summary

Full-Stack web developer with strong **Front-End** expertise in HTML, TypeScript, Tailwind CSS, and React.js, currently expanding **Back-End** skills with Node.js and Fastify. Passionate about building scalable, user-friendly web applications and eager to contribute to innovative teams.

Education

1337 Coding School April 2025

Digital Technology Architecture

Mohammedia Faculty of Science and Technology Juin 2021

Bachelor's Degree in Applied Physics

Mohammedia Faculty of Science and Technology Juin 2020

Diploma of Higher Education in Mathematics, Physics and Computer Science

Experience

Devoteam Cyber Trust October 2025 - April 2026

Full-Stack & DevOps Developer

Participated in designing and developing a scalable web application for Cyber Threat Intelligence using NestJS (Backend) and Next.js (Frontend), integrating PostgreSQL for data management. Implemented asynchronous workflows with RabbitMQ and orchestrated data pipelines using Apache Airflow. Leveraged Elasticsearch for efficient search and analytics, ensuring high performance and reliability across services.
